PREFACE

This issue of International School Building News is entirely given up to the course on the Educational Aspects of School Building which was held under the auspices of the Council of Europe in Ottenstein (Austria) in May and June 1968. This course forms an integral unit together with a second course which will be held in the beginning of 1969 in Leiden, Holland. The contents of the first part of the course, however, were of such great importance that International School Building News decided it ought not to deny its readers a report and a summary of the main lectures. The present number contains a short report of the interesting discussions that took place during the first course. A full report of both courses will be published in due time.

The report of the first course was formulated with the valued assistance of the Council of Europe, and in particular with that of Mr. G. Neumann, Deputy Director of Education and of Cultural and Scientific Affairs, as also of those experts who delivered lectures during the conference: Mr. G. Oddie, Mr. E. Pearson, Dr. L. Leitner, Dr. H. Mastmann, Mr. M. Hulteberg. We wish to thank them herewith for their co-operation.

The Editors
