GUIDE FOR THE PREPARATION OF MANUSCRIPTS TO PROSPECTIVE AUTHORS FOR THE SCIENTIFIC BULLETIN

A- OBJECTIVES

The Bulletin aims at the development of knowledge in the field of engineering, technology and related sciences. All innovative, valuable and useful articles as research or review papers or reports will be regarded. In order to guarantee the highest possible standard, the received articles are rigorously refereed. However, articles that have been published before or which were submitted for publication in another magazine will not be considered.

B- GUIDELINES

1. **Language** : English or Arabic

2. **Typescript** : The complete paper should be camera-ready, laser-typed, single-sided with double-line spacing, five-space paragraph indentation, on standard A4 size paper. The Times New Roman is the preferred font for use. 25 mm margin is to be left on the four sides of the page.

3. **Number of copies** : For the purposes of refereeing and editing, the original and three copies of the paper are required. The referees will receive unidentified copies.

4. **Length** : The fee will account for a maximum of 15 pages. Additional pages are charged as per page. All pages must be numbered.

C- CONTENTS

The first page of the article should include :

- A title consisting of a maximum of 10 words in bold capital letters (18 pt font) and centered.
- The authors names (14 pt font) followed by their affiliations and present addresses should be centered under the title.
- Indexing terms (12 pt font) containing a maximum of six key words indicating the area of the paper.

- An abstract of not more than 100 words (14 pt font) in the same language of the text to give the summary of the main contents of the paper. This should give a clear and concise view of the state-of-the-art and motivation of the subject, an outline of the paper and its contribution. The abstract should not include any references.
- A translation in the other language.

The following pages should include :

- A list of the used symbols, acronyms, etc.
- An introduction explaing the nature of the study, previous work, purpose and contribution of the paper.
- The text of the article suitably itemized.
- Conclusions indicating advantages, limitations and possible applications.
- Mathematical equations typewritten leaving double-spaces on either side and using the SI units.
- Drawing computer- designed made using India ink on transparent or white paper. Lettering must be typewritten or written by template.
- Tables should be typewritten in serial with clear headlines and should not be a repetition of any information that has appeared somewhere else in the article.

Ain Shams University | Scientific Bulletin | Faculty of Engineering
Vol. 32, No. 2 June, 30, 1997

Table of Contents

PART I

Architecture and Civil Engineering — Page

1 Behavior of Reinforced Concrete Shear Panels Taking into Account Tension Stiffening — 1
M. M. H. Attabi

2. Ultimate Strength of Hybrid Steel Frames with Initial Imperfections — 31
Mohamed El Aghoury

3 A Study of Some Commercial Permeability Reducing Admixtures — 41
H. I. El - Sayad

4. Strength of Starred Angle Compression Member with Interconnectors — 55
Mohamed El Aghoury

5 Investigating the Use of Large Maximum Size Aggregate in Asphalt Mixes. and Evaluating Field Asphalt Cores By Means of Newly Developed 6" - Inch Diameter Marshall Equipment — 67
Osama Hussein M. Okail

6 A New Approach for Estimating the Parameters of the Channel Routing Model for the Blue Nile — 83
M. Abdelatif, Sohier M. Kamel , N. A. Hassan, M. M. Hassan

7. Prediction of Flow velocity Profile in Nonuniform Open-Channel Flow — 101
Kassem Salah Abdl Wahab El-Alfy

8 Minimizing of Scour Around Bridge Piers Using A new Method for Vortex Reduction — 115
M. M. Abdel-Motaleb

PART II

Electrical and Mechanical Engineering, Physics and Mathematics

9 Temperature Dependence of Switching Characteristics of Amorphous $Ge_{20}As_{30}Se_{50-x}Te_x$ Chalcogenide Glasses — 129
Kadry I. Montasser

10 A Novel Approach for Arabic OCR Using Neural Networks — 147
G. El-Amin Abo-Samra, Samir I. Shaheen & A. Abdel-Magid

11 Airline Crew Scheduling using Genetic Algorithms — 169
Hoda Baraka

12 General Form of Changing the Basic Economic Qualitative and Quantitative Parameters of Electric Transmission System — 187
A. T. M. Taha

13 Variable Load Constant Voltage Self- Excited Reluctance Generator — 197
A. B. Kotb

14 Adaptive Neural Network Based Controller for Robots — 211
Mag[illegible] M. Abdelhameed

15 Perf[illegible]mance of Flat nose Cutting Edge in Single point Tool — 225
E. Y. El-Kady

16 Evaluation of Room Air Motion with an Obstruction Inside the Room — 243
M. B. Abu-El-Hassan, M. H. Hosni, I. M. El-Moghazy & M. Abd-El-Wahab

17 Effect of Swirl on the Stability of Confined Jet Diffusion Flames — 261
A. S. Zakhary

18 Optimum Effectiveness of Heat Pipe Heat Exchangers — 277
M. Abo El-Nasr

19 Analysis of the Interacting Forces Between A Pneumatic Tire and A Rotated Drum — 291
T. A Nosseir, A. E. Abdel Aziz, M. A. Said & I. Omran

20 Boundary Value Problems and Integral Representations for the Non Model Linear Hyperbolic Equation of the Second Order with an Interior Singular Line in the Infinite Regions — 307
A. N. Adib
